

I have been sick with a chronic sinus infection for over six months. I went through six rounds of antibiotics, allergy medicine, steroids as well sinus rinses and countless hot showers and steam sessions to loosen and clear the mucus. The next resort would of been surgery, which I didn't want to do. Within two hours of using the Acupressure Ring, my sinuses began to drain and I eliminated the bloating from the steroids I was on! I have spent hundreds of dollars and had several doctor's appointments and tests to figure out the cause and treatment for this horrible infection. Four dollars & two hours later I feel better than I have in months!
